The Synthetic Data Quality Score is computed by taking a weighted combination of the individual quality metrics: Field Distribution Stability, Field Correlation Stability and Deep Structure Stability. Learn more about Synthetic Data Quality Score (SQS)

Data Summary Statistics

	Training Data	Synthetic Data
Row Count	5000	5000
Column Count	43	43
Training Lines Duplicated	--	0

What do these values mean?

Privacy Protection Summary

Default Privacy Protections			Advanced Protections
 Outlier Filter Disabled ?	 Similarity Filter Disabled ?	 Overfitting Prevention Disabled ?	 Differential Privacy Disabled ?

Training field overview ?

Field	Unique	Missing	Ave. Length	Type	Distribution Stability
